- Scratch-resistant anodized aluminium structure
- Center accessories holder with locking knob for 12mm diameter accessories
- Double protractor: indicates both the arms angle and the centre accessory angle
- Ruler with millimeter resolution
- Support for optional 3rd and 4th arm
- Six stable feet

Quality

When designing this product, we wanted to far exceed the quality of all available competing product, yet at the same time beat the price. To achieve that, we used a mixture of custom 3D printed parts and standard mechanical components.
