

GALLIUM

SKU: material-gallium

PRODUCT DESCRIPTION

Gallium is available in the following forms:

1. Ga₂O₃ oxide
2. Pure metal

It is not possible to offer Gallium in other forms due to the low melting point as we could not guarantee integrity during shipment.

Ready-to-use alloys such as GaInSn, GaIn, GaAl, GaSn and Copper Indium Gallium Selenide (CIGS) are also available.

We are able to provide custom-cut ingots at amazing prices as we keep no stock and everything is delivered straight from the factory.
